

WHAT IS CLAIMED IS:

1. A gaming machine comprising:

internal lottery means configured to determine an internal lottery of a game with a random number at a predetermined timing;

5 display means configured to display an effect image pertinent to the game;

display control means configured to control the display means; and

10 attachment means configured to attach the display control means on a cabinet of the gaming machine.

2. The gaming machine as claimed in claim 1, wherein the attachment means comprises: a hook provided on one of a pair of the display control means and the cabinet; and a hook hole formed on one of the pair of the display control means and the cabinet.

15 3. The gaming machine as claimed in claim 2, wherein the display control means is hooked at an upper end of the cabinet with the hook and the hook hole, and

wherein the display control means is fixed onto the cabinet at a predetermined portion.
